CAREER OBJECTIVE

Dedicated **Full Stack Developer** with hands-on experience in the MERN stack, passionate about building responsive and user-centric web applications. I am eager to contribute to real-world projects where I can apply my technical skills and problem-solving abilities while continuously growing as a developer.

SKILLS

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, REST API

Backend: Node.js, Express.js, MongoDB, Better Auth and JWT

Tools: Git, GitHub, Daisy UI, Hero UI, Framer Motion, GSAP

Interpersonal Skills

Organized, Goal-Oriented, Quick Learner, Team Collaborator, Adaptable, Responsible, Self-Motivated

PROJECTS

BookNPlay – Sports Facility Booking Platform

[Live Link](#) | [Client Code](#) | [Server Code](#)

A full-stack sports facility booking platform enabling users to discover, book, and manage sports venues online with secure authentication and real-time booking management.

Technology Used: Next.js, Node.js, Express.js, MongoDB, Better Auth, Tailwind CSS

Key features:

- Secure user authentication and authorization using Better Auth.
- Real-time sports facility booking and schedule management system.
- Browse all available sports facilities with images, pricing, and details

KeenKeeper – Friend Management & Analytics App

[Live Link](#) | [GitHub Repo](#)

An interactive web application for organizing and managing friend information with data visualization, real-time notifications, and relationship tracking features.

Technology Used: React.js, Tailwind CSS, React Router

Key Features:

- Friend tracking system to log contacts and record last interaction details per connection.
- Reminder mechanism to notify users when they haven't interacted with a friend for a set period.
- Notes feature to store personalized conversations and relationship history per contact.
